

Bedti-Varada River Interlinking Project

For Prelims: Bedti- Varada River Interlinking Project, Tungabhadra River

For Mains: Issues of Rivers Interlinking Projects

Why in News?

Environmental groups in Karnataka have criticised the project to link the **Bedti and Varada rivers** in **Karnataka**, calling it unscientific and a waste of public money.

What is the Bedti-Varada Project?

- The **Bedti-Varada project** was envisaged in **1992 to supply drinking water**.
- The plan aims to link the **Bedti**, a river flowing west into the **Arabian Sea**, with the **Varada**, a tributary of the **Tungabhadra River**, which flows into the **Krishna**, which in turn flows into the **Bay of Bengal**.
- A massive dam will be erected at **Hirevadatti in Gadag district**.

- A **second dam** will be built on the **Pattanhalla river at Menasagoda in Sirsi**, Uttara Kannada district.
- **Both dams will take water to the Varada** via tunnels.
- The water will reach **Kengre** and will then go down a 6.88 km tunnel to **Hakkalumane**, where it will join the Varada.
- The project thus envisages taking water from the water surplus **Sirsi-Yellapura region of Uttara Kannada district to the arid Raichur, Gadag and Koppal districts**.
- A total of 302 million cubic metres of water from **Pattanhalla and Shalmalahalla tributaries of the Bedti and Varada rivers**, while **222 million cubic metres of water will be drawn from the barrage at Suremane built against the Bedti river**.
- The Project would need 61 megawatts of power to pull the water all the way to Gadag. Even after this, it is unknown whether the water would reach Gadag.

What are the Issues associated with this Project?

- **Difficult to Redirect:**
 - It is difficult to redirect a westward-flowing river to flow eastward.
- **Rain-fed Rivers:**
 - In early summer, the Bedti and Varada rivers begin to dry up.
 - It is a **sad irony that government scientists plan to interconnect these rivers** under the pretext of providing drinking water despite knowing well that **they do not flow all year**.
- **Project Report not Accurate:**
 - The **Detailed Project Report (DPR)** drawn up by the irrigation department **is not accurate** as it **was drawn without assessing the availability of water** and quoting the observation of the [National Water Development Agency \(NWDA\)](#) report on the interconnection of the Bedti-Aghanashini and Varada rivers.
- **Environmental Impact:**
 - Over **500 acres of forests will be lost**. The end result will be that **there will still be no water**.
 - Flora and fauna will also suffer due to this project.
 - The **Bedti valley** has been designated as an **active biodiversity zone** by the [International Union for Conservation of Nature](#).
 - The area is home to **1,741 types of flowering plants as well as 420 species of birds and animals**.
 - The nutrients that the river carries with it are responsible for sustaining fish **stocks, especially in the Bedti's estuary in Dedi**.
 - The river valley serves as a corridor for around 35 different animal species. The **Bedti is known as Gangavali** in the estuary region.
- **Affect Lifelines for Thousands:**
 - The **Bedti and Varada rivers are also lifelines for thousands of farmers** in the Malenadu region, the foothills of the Western Ghats, in addition to fishing communities along the coast.

Way Forward

- **Interlinking of rivers** has **its pros and cons**, but given the economic, political, and environmental implications, it may not be a wise decision to carry out this project at a centralized national level.
- Instead, **interlinking rivers may be pursued in a decentralized manner**, and more **sustainable ways like rainwater harvesting should be promoted to mitigate floods and droughts**.

UPSC Civil Services Examination, Previous Year Question (PYQ)

Q. Recently, linking of which of the following rivers was undertaken? (2016)

- (a) Cauvery and Tungabhadra
- (b) Godavari and Krishna
- (c) Mahanadi and Sone
- (d) Narmada and Tapti

Ans: (b)

Exp:

- **Godavari and Krishna rivers** were interlinked in **Andhra Pradesh's West Godavari district under the Pattiseema Lift Irrigation Project.**
- **Therefore, option (b) is the correct answer.**
