

# P-81 Patrol Aircraft

For Prelims: P-8I Patrol Aircraft, COMCASA Agreement.

For Mains: India-US Defense Ties.

#### Why in News?

Aircraft manufacturer Boeing has delivered the 12<sup>th</sup> P-8I long-range maritime patrol aircraft to the Indian Navy. This completes the follow-on clause for four additional P-8I aircraft contracted in 2016.

## What are the Key Details of P-8I Aircraft?

- It is a long-range Maritime Reconnaissance and Anti-Submarine Warfare Aircraft.
- It is an Indian variant of the P-8A Poseidon aircraft that Boeing company developed as a replacement for the US Navy's ageing P-3 fleet.
- With a maximum speed of 907 kmph and an operating range of over 1,200 nautical miles, the P-8Is detect threats and neutralize them if required, far before they come anywhere near Indian shores.
- The Indian Navy became the first international customer for the P-8 aircraft in 2009.
  - The Navy had procured eight P-8Is under a USD 2.2 billion deal in 2009. The aircraft are part of the 312A Naval Air Squadron based at Arakkonam in Tamil Nadu.
  - In 2016, the Navy exercised the optional clause for four more P-8Is in a deal worth over USD 1 billion.
  - Further in May 2021, the US State Department approved the possible sale of six additional P-8I aircraft and related equipment, to India.
  - The six P-8Is will come installed with encrypted communication systems since India has now signed the foundational agreement Communications Compatibility and Security Agreement (COMCASA) with the US.

### **How are Indo-US Defense Ties?**

- This proposed sale (approved in 2021) will help to strengthen the US-Indian strategic relationship.
  - For the US, India continues to be an important force for political stability, peace, and economic progress in the Indo-Pacific and South Asia region.
- Defense purchases from the United States have been increasingly an integral part of growing ties between the two countries.
  - From near zero in 2008, India-US defence trade touched USD 20 billion in 2020, helped along by major policy upgrades.
- The US designated India a Major Defence Partner (in 2016) and then granted it the same access to defence technology as <a href="NATO">NATO</a> allies and Australia, Japan and South Korea under Strategic Trade Authorization-1 (STA) in 2018.

# What is the COMCASA Agreement?

COMCASA (Communications Compatibility and Security Agreement) is meant to provide a legal

framework for the transfer of communication security equipment from the US to India that would facilitate "interoperability" between their forces — and potentially with other militaries that use US-origin systems for secured data links.

- It is **one of the four foundational agreements** that the US signs with allies and close partners to facilitate interoperability between militaries and sale of high end technology.
- It is an India-specific version of the Communication and Information on Security Memorandum of Agreement (CISMOA).
- Four Foundational Agreements between the US and its Partners:
  - **General Security Of Military Information Agreement (GSOMIA)** Signed by India in 2002.
    - Allows militaries to share the intelligence gathered by them.
  - Logistics Exchange Memorandum of Agreement (LEMOA) Signed by India in 2016.
    - Allows both countries to have access to each other's designated military facilities for refueling and replenishment.
  - Communications and Information Security Memorandum of Agreement (CISMOA)
    Signed by India in 2018.
    - Communications Compatibility and Security Agreement (COMCASA) is the India specific version of CISMOA.
  - Basic Exchange and Cooperation Agreement (BECA) India has <u>signed BECA</u> in 2020.
    - Allows India and US militaries to share geospatial and satellite data with each other.
