

## Forest Fire & Landmine Explosions in Jammu and Kashmir

## Why in News?

In **Jammu and Kashmir's Poonch district,** a <u>forest fire</u> along <u>the Line of Control (LoC)</u> triggered the explosion of nearly half a dozen landmines, which were part of an <u>anti-infiltration obstacle system.</u>

## **Key Points**

- Explosions Triggered by Forest Fire:
  - The explosions were triggered by a forest fire that spread to Indian territory in the Krishna Ghati sector, Mendhar sub-division.
  - The fire began on the other side of the border before spreading to Indian forward areas.
  - Authorities are investigating the cause, with speculation of deliberate attempts from across the border to damage India's anti-infiltration obstacle system.
- Casualties and Control Measures:
  - No casualties have been reported and efforts to control the flames are actively ongoing.
- Army Response:
  - The Indian Army stationed along the LoC is on high alert to prevent potential infiltration attempts by terrorists.

## **Line of Control**

- The Line of Control (LoC) emerged from the 1948 ceasefire line negotiated by the **United Nations** (UN) after the **Kashmir War.**
- It was designated as the LoC in 1972, following the Shimla Agreement between the two countries.
- LoC is demarcated upto the Siachen Glacier (Point NJ9842)- the world's highest battlefield.
- LoC is delineated on a map signed by the Director General of Military Operations (DGMO) of both armies and has the international sanctity of a legal agreement.
