

Omisure Kit

Why in News

Recently, the Indian Council of Medical Research (ICMR) has approved a made-in-India testing kit, named Omisure, for detecting the Omicron variant of the SARS-CoV-2 coronavirus.

- The kit currently in use to detect Omicron in the country has been developed by the US-based scientific instrumentation company Thermo Fisher.
- Further, the **World Health Organisation (WHO)** has proposed some measures to strengthen laboratory capacities, with the focus on addressing inequalities in access to **Covid-19** diagnostics tools.

Key Points

- About Omisure:
 - This RT-PCR kit is manufactured by Tata Medical and Diagnostics.
 - It uses S-Gene Target Failure (SGTF) strategy.
 - Currently, Omicron patients are detected only after genome sequencing.
 - However, the Omisure test kit helps to eliminate this step and detects the Omicron variant of SARS-CoV2 in the nasopharyngeal/ oropharyngeal specimens during the RT-PCR tests.
 - The Omicron variant underwent several mutations in the S-gene, the SGTF strategy checks and indicates it in patients who are detected Covid positive.
 - 'S' Gene, ORF, 'N' gene, Rdrp, 'E' gene are viral genes that are targeted to detect Covid-19 virus.
- WHO Propositions:
 - **Genomics Consortium**: The WHO is proposing to set up a SARS-CoV-2 genomics consortium in **Southeast Asia**.
 - The consortium will help enhance genomic sequencing and surveillance to develop a robust regional system for detecting and monitoring the evolution of SARS-CoV-2 viral threats for epidemics and pandemics.
 - Genome Sequencing: WHO had called for increased genome sequencing.
 - This will also help improve the timely use of genomic data for public health decisionmaking and to strengthen preparedness and response to future outbreaks/ pandemics.
 - Addressing Key Barriers: Need to check key barriers like limited trained workforce and other resources for sustained long-term testing and sequencing capacities.

Indian Council of Medical Research (ICMR)

• ICMR is the apex body in India for the formulation, coordination and promotion of biomedical

research.

- It was founded in 1911 with the name of **Indian Research Fund Association (IRFA)** and renamed as ICMR in 1949.
- It is funded by the Government of India through the Department of Health Research, Ministry of Health & Family Welfare.
