

Aphantasia

[Source: IE](#)

- A study by the University of Glasgow explored **aphantasia**, a condition where individuals **cannot visualise images in their mind**.
- Aphantasia, first noted by Francis Galton in the 1880s; the term "aphantasia" was coined in 2015 by neurologist Adam Zeman.
 - It affects about **2% of the population**, with ongoing research needed to understand its causes and implications.
- On the other end of the spectrum are individuals with **hyperphantasia**, who possess an exceptionally vivid imagination, often experiencing mental images as if they were real.
