

## **Indian Light Tank (ILT) Zorawar**

## **Source: HT**

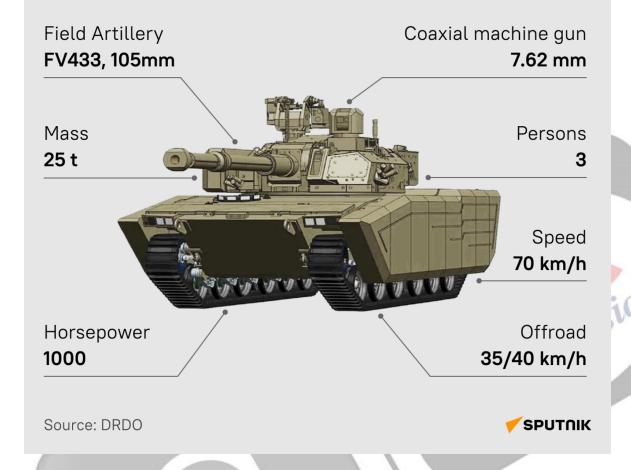

The <u>Indian Light Tank (ILT)</u>, also known as Zorawar, has successfully completed firing trials at an altitude of over 4,200m.

- It was jointly developed by the <u>Defence Research and Development Organisation (DRDO)</u> and Larsen & Toubro (L&T) with contributions from various <u>Micro, Small, and Medium</u>
  <u>Enterprises</u> for high-altitude warfare and rapid deployment.
- Key Features:
  - High-Altitude Performance: It successfully fired multiple rounds with precision at varying ranges and demonstrated exceptional mobility and reliability in the challenging terrain of Ladakh.
  - **Airlift Capability:** It was successfully airlifted by the **Indian Air Force**, enabling rapid deployment to remote and inaccessible areas.
- **Significance:** It strengthens India's **mountain warfare capabilities** with indigenous innovation, offering air transportability, high-angle firing, and limited artillery roles for enhanced mobility.

## Indigenous Zorawar Light Tank: Why is It Called 'Brave and Strong'?

Developed by L&T in collaboration with DRDO
