

Professor Sohan Lal of Chemistry Department, Kurukshetra University received the Young Scientist Award.

Why In News?

Prof. Sohan Lal of the Department of Chemistry, Kurukshetra University, located in Kurukshetra district of Haryana, has been honored with the Young Scientist Award in a program organized by the Environment and Social Development Association at Galgotias University in Delhi on November 6, 2023.

Key Points:

- It is noteworthy that the Young Scientist Award is given to researchers below 40 years of age working in the field of research. Prof. Sohan Kumar has been honored with the award at the age of 37 for his excellent work in the field of research.
- This award encourages the youth to do excellent work in the field of research and environmental protection and also motivates them to work harder.
- Prof. Sohan Lal has done excellent work in the field of research to re-use waste polythene, which is a serious problem of polluting the environment.
- He has researched that by reusing waste polythene, paver blocks, chairs or other useful items can be made, which will reduce the pollution caused by plastic and it can also be reused.
- While he has worked to utilise waste polythene, he has also worked on making antibiotic medicines containing natural ingredients and is continuously working in the field of research.
- Prof. Sohan Lal has received this award from Padma Bhushan Chandiprasad Bhatt, who started the Chipko movement and has done a lot of work in the field of environment.
