

E-Office Implementation in Government Bodies

Source: [ET](#)

The Indian government has announced that the [e-office platform](#) will be implemented across all attached, subordinate offices and autonomous bodies as part of the **100-day agenda of the [Department of Administrative Reforms and Public Grievances \(DARPG\)](#)**.

- The e-office initiative aims to **digitise file handling and receipts across various government bodies**. This move follows the successful adoption of the e-office in the central secretariat between 2019 and 2024, where **94% of files and 95% of receipts were handled electronically**.
- Building on this success, the government has identified 133 entities for this initiative, following inter-ministerial consultations. Guidelines for the adoption were by DARPG, and the [National Informatics Centre \(NIC\)](#).
 - Each ministry and department will appoint nodal officers, establish data centres, and coordinate with NIC for a seamless, time-bound onboarding of the e-office system, reinforcing the government's commitment to digital transformation and administrative efficiency.
