

Fire Broke Out at Maha Kumbh Mela

Why in News?

A fire broke out at the <u>Maha Kumbh Mela</u> in Prayagraj, UP, on **19**th **January, 2025**, due to a <u>Liquefied</u> <u>Petroleum Gas (LPG)</u> cylinder blast leading to the destruction of 18 tents.

■ The **45-day Maha Kumbh Mela**, which began on <u>Paush Purnim</u> on **13**th January, **2025**, is one of the world's largest religious gatherings.

Key Points

- The fire was promptly extinguished, and no casualties or injuries were reported.
 - The incident occurred near the **Shastri Bridge** in **Zone 19** of the Mela.
- Liquified Petroleum Gas (LPG):
 - LPG is a flammable mixture of hydrocarbon gases, primarily propane and butane, used as fuel for heating, cooking, and even in vehicles.
 - It is stored in liquid form under pressure in tanks or cylinders.
 - When the pressure is released, **LPG vaporizes** and can be used as a gas.
 - It is widely used in households and industries due to its clean-burning properties and high energy content.
