

Rise of the Indian Rupee

This editorial is based on [Will rupee trade gain currency globally?](#) which was published in The Hindu Businessline on 23/07/2023. It talks about the de-dollarization and internationalization of Indian rupee.

For Prelims: [De-dollarisation](#), [Currency Swap Agreements](#), [Capital Account Convertibility](#), [SWIFT](#), [International Financial Services Centre](#), [Unified Payments Interface](#), [Special Vostro Rupee Accounts](#), [Reserve Bank of India](#)

For Mains: Benefits and Challenges of De-dollarization

In the realm of global trade, the **US dollar has long reigned supreme**, acting as the dominant currency **for foreign exchange transactions**, trade invoicing, and **reserve holdings**.

India's ongoing efforts to promote the **use of the rupee in international trade** represent a step towards [de-dollarisation](#) and **currency diversification**. While challenges remain, the **combination of export growth**, [capital account convertibility](#), and **sustained economic development** may pave the way for the rupee to gain currency globally.

The journey to reduce dollar dominance **requires concerted efforts, and success will depend on India's resilience and adaptability** in a rapidly evolving global economic landscape.

However, an increasing number of countries are recognizing the **inherent risks that come with an overreliance on the dollar**, including exposure to **US politics, sanctions, and exchange rate volatility**. As a response to these concerns, many emerging economies are actively pursuing efforts to de-dollarize their trade and diversify their currency usage.

What are the Trends in Currency Usage?

- **Use of Local Currencies in International Payments:**
 - [SWIFT](#) data indicates a rise in the usage of local currencies in international transactions between 2013 and 2019.
- **Non-Dollar-Denominated Trade on the Rise:**
 - The **Triennial Bank Survey of 2022** shows a marginal increase in the share of dollars in daily turnover, but emerging economies are increasingly engaging in non-dollar-denominated trade.
- **Rise of the Chinese Renminbi:**
 - In 2022, the **Chinese renminbi became the fifth most traded currency globally**, with over 70% of China-Russia trade settled in yuan and roubles.
- **Growth of Local Currency Bond Markets:**
 - Emerging market **local currency bond markets** expanded significantly from **2015 to**

2021, presenting an alternative to dollar-denominated assets.

What are India's Efforts to Strengthen the Rupee?

- **Establishment of the International Financial Services Centre (IFSC):**
 - India's first IFSC in **GIFT City, Gujarat**, aimed to promote the use of the rupee in **international financial transactions**.
- **Liberalization of Capital Markets:**
 - India increased the availability of rupee-denominated financial instruments, such as **bonds and derivatives**, to **enhance the rupee's appeal**.
- **Promotion of Digital Payment Systems:**
 - Initiatives like the **Unified Payments Interface (UPI)** have facilitated digital transactions in rupees.
 - Recently, France and Singapore have adopted UPI.
- **Introduction of Special Vostro Rupee Accounts (SVRAs):**
 - India permitted **authorized banks from 18 countries to open SVRAs** for settling payments in rupees at market-determined exchange rates.
 - Objectives of the Mechanism are lower transaction costs, greater price transparency, faster settlement time, and overall promotion of international trade.

What are the Opportunities for the Rupee's Global Standing?

- **Export Growth as a Catalyst:**
 - India's ambitious **export target of \$2 trillion by 2030** could contribute to improving the rupee's international standing.
- **Full Capital Account Convertibility:**
 - Achieving **full convertibility of the rupee would enhance its attractiveness** for international trade and investments.
- **Sustained Economic Growth:**
 - Higher and sustained **economic growth would strengthen India's position** in the global trade market.
- **Reducing US monetary Policy Influence:**
 - By reducing the use of the US dollar, countries **can reduce the influence of US monetary policy** on their own economies.
- **Improved Monetary Policy Effectiveness:**
 - Internationalisation **can enhance the effectiveness of India's monetary policy**.
 - With a broader international reach, the **Reserve Bank of India (RBI)** can use the exchange rate as a tool to manage inflation and stimulate economic growth.
 - It provides greater **flexibility in managing monetary conditions** and responding to economic challenges.

What are the Challenges and Limitations of Trade in Rupee?

- **High Dependency on Dollar Invoicing:**
 - Despite efforts, a **significant portion (86%) of India's imports is still dollar invoiced**, limiting the impact of de-dollarisation.
- **Non-Convertible Currency Concerns:**
 - Partner **countries may hesitate to engage in local currency trade** due to the rupee's lack of convertibility, leading to potential trade challenges.
- **Ballooning Rupee Reserves:**
 - Accumulation of rupees in partner countries' **reserves without adequate avenues** for its use may pose issues.
- **Exchange Rate Volatility:**
 - Internationalising the rupee exposes it to greater **exchange rate volatility**.
 - Fluctuations in the value of the rupee **can impact trade competitiveness, foreign investment flows**, and financial market stability.
 - Managing exchange rate risks becomes crucial in order to mitigate potential adverse effects.

- **Capital Flight and Financial Stability:**
 - Opening up the rupee to international markets may lead to capital flight if **investors lose confidence in the currency or anticipate unfavourable** economic conditions.
 - This can strain the country's foreign exchange reserves, impact financial stability, and create challenges for monetary policy management.
- **Capital Controls:**
 - India **still has capital controls in place that limit the ability of foreigners to invest** and trade in Indian markets.
 - These restrictions make it difficult for the rupee to be used widely as an international currency.
- **Competing Currencies:**
 - The rupee faces competition from established international currencies like the **US dollar, euro, and yen**, which enjoy widespread acceptance and liquidity.
 - Gaining market share and displacing these dominant currencies **can be a significant challenge**.

What Should be the Way Forward?

- **Strengthening Currency Convertibility:**
 - India should **focus on achieving full capital account convertibility** for the rupee.
 - This will **enhance its attractiveness** as a viable currency for international trade and investments.
 - Efforts to **liberalize capital flows and ease foreign exchange** controls are crucial in this regard.
- **Encouraging Bilateral Currency Arrangements:**
 - India can explore **bilateral [currency swap agreements](#)** with partner countries to promote the use of the rupee in trade settlements.
 - Such arrangements **can reduce dependence on the dollar** and foster stronger economic ties with other nations.
- **Leveraging Regional Initiatives:**
 - India can collaborate with other countries in the region to **promote regional trade settlements** in local currencies.
 - Participating in initiatives like the **Chiang Mai Initiative Multilateralization (CMIM)** can strengthen the use of Asian currencies in trade and reduce reliance on the dollar.
- **Diversifying Trade Partnerships:**
 - India should **diversify its trade partnerships to reduce the concentration of imports** and exports with specific countries.
 - Engaging with a broader range of trading partners will create opportunities for increased usage of the rupee in global trade.
- **Building Trust in Currency Stability:**
 - Demonstrating prudent fiscal and monetary policies and maintaining currency stability will **instil confidence in the rupee as a reliable and stable currency** for international trade.

Drishti Mains Question:

How can India enhance the role of the rupee in global trade and reduce its dependency on the US dollar?

UPSC Civil Services Examination Previous Year's Question (PYQs)

Prelims:

Q. Recently, which one of the following currencies has been proposed to be added to the basket of IMF's SDR? (2016)

- (a) Rouble
- (b) Rand
- (c) Indian Rupee
