

Google Safety Engineering Centre in Hyderabad

[Source: TH](#)

Hyderabad has been chosen as the site for **India's first Google Safety Engineering Centre (GSEC)**, marking a significant milestone in the [country's cybersecurity](#) landscape.

- GSEC, Hyderabad **will be the first of its kind in the Asia-Pacific region**, and only the **5th globally**, following similar facilities in Dublin, Munich, and Malaga.
- GSEC will specialise in advanced research, [Artificial Intelligence \(AI\)](#)-driven security solutions, and skill development while addressing India's unique cybersecurity challenges.
 - The project is expected to **bring thousands of direct and indirect employment** opportunities to Hyderabad and Telangana.
- Google and the Telangana state government are exploring collaborations in education, startups, and smart city initiatives.
- Hyderabad is already home to **five major tech companies: Alphabet (Google), Microsoft, Apple, Amazon, and Meta.**
 - Telangana registered over 1,800 startups during 2022-23 and has supported over 550 startups through incubation.
- [T-Hub](#), along with initiatives like **T Works** (India's largest prototyping centre in Hyderabad), has catalyzed growth in [deep tech](#) and manufacturing startups, positioning Hyderabad as a key player in India's startup landscape.
