

Effective Control of Forest Fire in Uttarakhand | Uttarakhand | 31 Jan 2025

Why in News?

Uttarakhand CM **Pushkar Singh Dhami** has directed the **Chief Conservator of Forests (CCF)** to take **immediate action** against **forest fires** in **highly sensitive districts**.

Key Points

- Appointment of Nodal Officers for Fire Control:
 - 10 senior Forest Department officers appointed as district-level nodal officers.
 - Their role is to coordinate resources and departments at the district level for better fire management.
 - Efforts will focus on strengthening management, control, monitoring, cooperation, and coordination at the district level.
- Pre-Fire Season Preparations:
 - The **<u>Uttarakhand Forest Department</u>** issued an **office order** to appoint nodal officers before the season in which forest fires commonly occur.
 - Nodal officers will review fire management preparations and district-level control measures.
- Community Participation in Fire Control:
 - Along with this, to increase community participation in forest fire control and management, the Forest Department of Uttarakhand has been conducting research on-field personnel, **State Environmental Authority (SEA)** and the Forest Fire Management Committees to replicate the '**Sheetalakhet**' model in all the divisions of the state under the Almora Forest Division.
 - The **'Sheetalakhet' model**, developed under **Almora Forest Division**, is being replicated across all state divisions.

Forest Fire

- Forest fire is also called as **bush or vegetation fire or wildfire**, it can be described as any **uncontrolled and non-prescribed combustion or burning** of plants in a natural setting such as a **forest**, **grassland**, **brushland** or **tundra**, which consumes the natural fuels and spreads based on environmental conditions (e.g., wind, topography).
- A wildfire requires three essential elements to sustain combustion like **Fuel**, **Oxygen**, and a **Heat source**.
