

New Approach for Post-Covid Education

Why in News

Due to a **surge in Covid-19 infections** in the **Second Wave** of infections, the education of students in the entire nation is affected.

Key Points

▪ Concerns:

◦ Availability of Online Education:

- Online education was envisioned as an alternative means of spreading education, but it too fails, given the Indian students' conditions.
- The **availability and affordability of this system poses a barrier.**
- **While e-education is a privilege for the students from an upper and middle class**, it has proved to be a **nuisance for students from the lower middle class** and people living **below the poverty line.**

◦ Long-Term Exposure to Internet:

- There are also implications of longer exposure to the internet for these young kids.
- This may create **impediments to the development of the thinking process** in the younger generation.

◦ Decreasing Analytical Thinking:

- The other important question is about the **learning outcomes of online education.**
- Google is the prominent and **only** platform to all queries, and as a result of that, **students are not thinking on their own.**

- Scientific outlook was the key parameter stressed upon since the inception of modern education in India.

◦ Increasing Student Isolation:

- Due to the pandemic and lack of physical classroom teaching, a peculiar **feeling of isolation is developing in the minds of students.** That's a very serious issue. The trauma of the second wave will put a deep imprint on the student's mind.
- **Physical interaction and activities have been entirely absent**, and that may also be contributing to **new problems.**

▪ Possible Solutions:

◦ Use of Infrastructure:

- The whole **infrastructure should be fully utilised**, and if necessary, many **more facilities should be invested in** (and created) to impart education.

- As classroom teaching gives us the opportunity to impart many more things

apart from information.

- **New Content:**

- Institutions should **contemplate new content generation for each subject** to overcome the absence of classroom teaching within the framework of the existing syllabus.
- This content would be of a **new type, self-explanatory, and considering the lowest IQ of the class**, it has to be attractive.
- The content **should produce the same effect on the minds of the students that the best book imparts** on the thinking faculty.

- **Personal Supervision:**

- The teachers and non-teaching staff should **visit the locality of the students (in and around the school area) on a weekly basis** to supervise the whole work.
- They should **take notes on the problems faced by students** in understanding the reading material and also whether things are reaching them on time.

- **New Evaluation System:**

- The evaluation should be **based on the capacity of analysis, and the questions** should be framed in such a way that **students need to apply their minds** to answer the questions on each subject.

- **Prioritizing Vaccination:**

- In addition, the **government should take the responsibility to [vaccinate](#) the whole teaching community** as fast as possible to advance this learning process.

- **Related Government Initiatives for E-Learning:**

- **E-PG Pathshala:**

- An initiative of the Ministry of Human Resource Development to provide e-content for studies.

- [SWAYAM](#):

- It provides for an integrated platform for online courses.

- [NEAT](#):

- It aims to use [Artificial Intelligence](#) to make learning more personalized and customized as per the requirements of the learner

- [PRAGYATA](#):

- The Ministry of Human Resource Development (MHRD) released guidelines on [digital education](#) titled PRAGYATA.
- Under the PRAGYATA guidelines, only 30 minutes of screen time per day for interacting with parents is recommended for kindergarten, nursery and pre-school.

- [National Programme on Technology Enhanced Learning](#):

- The NPTEL is a project of MHRD initiated by seven Indian Institutes of Technology (IIT), along with the Indian Institute of Science Bangalore.
- It was started in 2003 and its aim was to have **web and video courses in engineering, sciences, and management.**

Way Forward

- **Covid-19** has shown the extent to which the Indian system of education exploits inequalities.
- Thus, there is a **need for renewed commitments to the synergy between the private and public education sector.** In this context, there is a **need to make education a common good and digital innovation can help in achieving the feat.**
