

## Hindon River

### Why in News?

Recently, a **large amount of silt and religious material has been dumped into [the Hindon River](#)** in Ghaziabad, further polluting the river.

### Key Points

- The Uttar Pradesh Irrigation Department attributed the river's pollution to the release of untreated drains into it, along with mismanagement and neglect of water quality.
- **Pollution in the river:**
  - **Dissolved oxygen (DO)** ranged from 1.43 to 4.22 mg/l, while the minimum DO required for aquatic life should be 4 mg/l.
  - Total **coliform levels** range from 260,000 to 380,000 MPN/100 ML, while the standard limit is 1,000 MPN/100 ML.
  - The **Uttar Pradesh Pollution Control Board (UPPCB)** has categorised the river's water quality as 'E', which means **the water is suitable only for irrigation, industrial cooling and controlled waste disposal.**
- In 2015, **the Central Pollution Control Board (CPCB)** declared the Hindon River a **dead river**, stating that it had **high levels of pollution** and was unfit for bathing in many parts.
