

New Airport Approved in Bihar

Why in News?

Recently, approval has been given by [the Airports Authority of India \(AAI\)](#) for the construction of a **new airport at Bihta, Bihar**.

Key Points

- **About Bihta Airport:**
 - It will be constructed **at a cost of** approximately **Rs 459 crore**.
 - The work of **construction of the airport has been assigned to a Russian company**.
 - The target has been **set to complete this airport by the year 2026**.
 - The Bihar government has allotted about 108 acres of land for the construction of the airport.
 - Along with this, **Danapur-Bihta elevated corridor** is being constructed at a cost of about Rs 2000 crore, which is likely to be completed by the year 2026.
- **Benefits:**
 - This airport will be **connected to Patna city** and will also become a **new air traffic hub** for the entire Bihar and surrounding areas.
 - This will **enhance air connectivity** between major cities, driving growth in business and **tourism**.
 - The airport's construction will **boost local employment**, enhance passenger facilities, and **make travel more affordable**.
