

# Electrama 2025

## Why in News?

'Electrama-2025', the world's largest electrical show was organized at **India Expo Mart in Greater Noida**.

## Key Points

### ▪ About:

- This program was **organized from 22-26 February, 2025**.
- This was the **16<sup>th</sup> edition of Electrama**. It was organised by **Indian Electrical and Electronics Manufacturers' Association (IEEMA)**.
- During this event, electrical and energy technologies from around the world including India were demonstrated.
  - E-mobility and charging infrastructure
  - digital energy technology
  - Transformers, switchgear, insulators, High Voltage Direct Current (HVDC) systems
  - Fault Detection and Automation Systems
  - Drive and control technologies for industrial applications

## Electrama

- Electrama is the **largest and flagship event of the Indian electrical and electronics industry**, organised to showcase the eco-system of the power sector.
- The event is **held every two years** and is known as the largest gathering of the power industry in the country.
- The main objective of Electrama is to **bring together all aspects of the industry**.
- This event covers all aspects of electricity, including emerging technologies, innovative products, and future trends.
